## DETAILED ACTION

### *Specification*

1. The Specification is object of the following informalities: On page 1, of the Specification the US Patent Application Serial No. should be provided. Appropriate correction is required.

2. The abstract of the disclosure is objected to because of the phrase "Disclosed is a system" should be changed to "A method and apparatus". Correction is required. See MPEP § 608.01(b).

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Seet et al. (US Patent No. 6,496,803 B1).

Regarding claim 1, Seet discloses a method of reconstructing visual stimuli observable through a browser-based interface, comprising: receiving a selection of content for reconstruction [..for web site and HTML pages to provide a classification code for their contents to facilitate matching of advertisers with content providers.; see col 7, lines 7-50]; retrieving data; calculating what to display; and reconstructing a display. [..to calculate an amount to be paid for inserting the advertisement into the content identified in field, time the advertisement should be displayed.; see col. 19, lines 1-39].

Art Unit: 2173

Regarding claim 2, Seet discloses the method of claim wherein the parameter is a network address of all online content immediately displayed within a browser window at a point in time [...the process flow starts with the identification of a desired content by a reader and browser software user.; see col. 20, lines 7-53].

Regarding claim 3, Seet discloses the method wherein the parameter is a two dimensional offset of the online content as it is displayed within a browser window (see col. 10, lines 1-65).

Regarding claims 4 and 5, Seet discloses wherein the parameter comprises textual and binary objects systematically displayed within each browser window (see col. 16, lines 1-67).

Regarding claim 6, Seet discloses wherein the parameter is a graphical image of online content as displayed in a browser window (see col. 20, lines 1-6 and figure 8d).

Regarding claim 7, Seet discloses wherein the parameter is an inventory of objects that comprise online content, and the two-dimensional position of each object in a browser window (see col. 13, lines 23-61).

As claims 8-13 are analyzed as previously discussed with respect to claims 1-7 above.

Regarding claims 14-16, Seet discloses wherein data is stored as an article identifiable as an alphanumeric string; and comprising assigning a unique ID to each parent web page and each child web page (see col. 14, lines 1-63).

Art Unit: 2173

As claims 16-20 are analyzed as previously discussed with respect to claims 1-7 and 14-16 above.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (PTO-892).
